

SMI Cold Therapy Gel Bags Stay Colder Longer

“Average pain level at 6 weeks post operative was significantly less in the gel cryotherapy wrap group.”

“Skin” Temperature of the Left Lower Thigh Front Zone

“This study demonstrates that an institution can switch from the more expensive circulating cold water therapy device to a less expensive ice/gel pack cryotherapy compression wrap at a substantial savings without sacrificing patient outcomes or satisfaction.”

– Multifaceted Comparison of Two Cryotherapy Devices Used After Total Knee Arthroplasty
